

CAPABILITY STATEMENT

Kreative Technical Solutions (KRTS) is a small business consulting firm that focuses on software development and IT projects with government and commercial industries. We develop and implement systems to encourage higher work productivity and commitment for our clients. We align people, processes, and tools to fulfill the requirements that lead to real change. We believe quality is a commitment to our customers and not simply certifications that imply that we can do the job. Our goal as a company is to ensure that our services meet the needs of commercial and government contracts.

CORE COMPETENCIES

Network Security

We are dedicated to protecting mission critical systems and sensitive data from cyber-attacks. Our knowledge of cyber-security services enables us to build secure systems. We use best practices to fix legacy systems with security vulnerabilities. By applying continuous monitoring to our operating systems against security breaches we provide forensic investigation and full incident response.

Technical Development

Innovation in information management and business process modernization requirements are becoming more complex. Technology companies are drawing the battle lines to boost profitability. Winning projects require looking at labor costs, workforce mobilization, consolidation, and other driving factors that can improve return on investment. KRTS helps our clients develop and deploy the information services needed by creating SWAT (Small Working Agile Tactics) teams. These teams are formed to provide high quality services to our clients. They help meet challenges and world-class consulting services by drawing on broad experience to deliver practical solutions based on fresh thinking. Agile development strategies aid us in gaining a foothold in developing a superior quality products for our customers.

Operations and Maintenance

KRTS provides Operation and Maintenance services that takes a proactive approach in monitoring production software systems. Issues identified early on allows us to quickly resolve potential problems before they manifest into larger issues. We provide the following O&M services: Software Enhancements, Database administration and maintenance, Network level support for both hardware and software, 24x7 Tier technical support.

Quality Assurance

KRTS monitors each phase of software development. As part of the SWAT team QA helps identify the design and performance of products delivered to our clients. We focus on ensuring that the quality requirements will be fulfilled with confidence. Our dedication is to be CMMI level 3 and ISO 9000 compliant.

Project Management

KRTS project management services provide true collaboration and accountability among stakeholders that span our client's agency. We engage our customers to participate in the requirements and development of the project. Our methodologies align IT investments to our clients business driven strategic goals. Our team optimizes cost efficiencies and improves quality to achieve successful outcomes in the development and delivery of IT solutions. These include agile, cloud, network security, O&M, QA, and application modernization.
